DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to jewelry, classified in class 63, subclass 34.
- II. Claim 4, drawn to a method of manufacturing jewelry, classified in class 29, subclass 896.4.
- III. Claim 5, drawn to a method of cleaning jewelry, classified in class 117, subclass 58.

The inventions are distinct, each from the other because of the following reasons:

Inventions II, III, and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, there is more than one method for manufacturing jewelry, for example, as jewelry can be manufactured with different compositions such as 16 to 20 weight percentage of copper instead of 6 to 15 percent. There is also more than one method for cleaning jewelry, for in the instant case, jewelry can also be cleaned by brushing or scrubbing as opposed to a polishing process.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for either Group II or Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to Jonathan P. Soifer, P.C. on 12/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David C. Reese whose telephone number is 703-305-4805. The examiner can normally be reached on 7:30 am - 5:00 pm M-Th, and every other Friday.
